OVERVIEW

This document outlines three different approaches that are used to manage contractors.

- Contractor Plugin
- Accelerator Pack Contractor Management
- Accelerator Pack Contractor Management + Contractor Plugin

CONTRACTOR PLUGIN

User Interface to manage contractor hierarchy, Contractor Plugin onboarding create and edit Forms. No workflows and triggers are packaged with the plugin

1. On Installation, Identity Provisioning Policies show Contractor forms assignment for create and edit forms. Also, the “Contractor Plugin” application will be created for aggregation of data from Plugin database.

Lifecycle Manager

Type	Name	Description	
Create Identity	Contractor Create Identity	Create Identity Form	Delete Policy
Update Identity	Contractor Edit Identity	Edit Identity Form	Delete Policy

2. Manage Contractor Hierarchy Data
 - a. Contractor Agencies
 - b. Departments
 - c. Assignments (aka Contract)
3. Manages Vendor Contractors and Independent Contractors
4. Create Contractor Form – Contractor hierarchy fields are scoped to Contractor Account Admins and Sponsors. Additional contractor fields can be added to the form. This kicks off contractor onboarding (Joiner process on target applications).

Contractor Management

Create Identity

If you would like to request that a new identity be created, please fill in the fields below. Fields marked with an asterisk are required.

Contractor Create Identity

IDENTITY ATTRIBUTES

Identity Cube Type *

☒ Contractor

Contractor Unique Id *

First Name *

Last Name *

Email *

CONTRACTOR ATTRIBUTES

Joiner Lifecycle Event will be kicked upon Contractor Creation

Contractor Type

☒ Vendor Contractor

☐ Independent Contractor

Select Vendor Contractor for contractors that work for a vendor company.

Assignment *

Department *

Contractor Agency *

Contractor Sponsor/Manager *

Contractor/Assignment Manager *

Contractor Expiration Date *

Cancel

Submit

5. Contractor Form – Contractor hierarchy fields are scoped to Contractor Account Admins and Sponsors. Changes done using this form kicks off Attribute Synchronization to target systems (if configured). Additional contractor fields can be added to the form

Note: No workflows are provided with the plugin. There will be an application “Contractor Plugin” that will need to be aggregated for Contractor Agencies, Departments, and Assignments (Contract) as identity and managed attributes. These managed attributes are used on the forms to populate expiration date from profile and account manager/sponsor scoping.

ACCELERATOR PACK CONTRACTOR MANAGEMENT + CONTRACTOR PLUGIN

Packaged with contractor management workflows and their triggers, Contractor Plugin onboarding create and edit forms

1. On Installation, Identity Provisioning Policies would show Accelerator Pack forms assignment for create and edit forms. Accelerator Pack forms must have precedence over contractor plugin forms. Installation of Contractor Plugin may overwrite this behavior. Import accelerator pack-createidentity.xml and acceleratorpack-editidentity.xml after plugin installation. Also, “Contractor Plugin” application will be created for aggregation of data from Plugin database.

Lifecycle Manager

Configure Business Processes Identity Provisioning Policies

Use the form to build and modify the provisioning policies for creating and editing identities.

A list of provisioning policies associated with this identity. Add a new policy with Add Provisioning Policy or edit an existing policy by selecting it from the list.

Type	Name	Description	
Create Identity	Accelerator Pack Create Identity	Create Identity Form	Delete Policy
Update Identity	Accelerator Pack Edit Identity	Edit Identity Form	Delete Policy
Self-service Registration	Accelerator Pack Registration Identity	This form is used to for self-service registration.	Delete Policy

2. Manage Contractor Hierarchy Data
 - a. Contractor Agencies
 - b. Departments
 - c. Assignments (aka Contract)
3. Manage and Synchronize Contractors fields to/from authoritative Contractor Source. A contractor authoritative application can be onboarded to push contractor changes from IdentityIQ / Accelerator Pack to authoritative source (If desired). This can be done by onboarding application using Self Service Onboarding

Contractor Management

Wizard and checking the “Contractor Repository” option

Self Service Application Onboarding

Aggregation

Please provide aggregation data classification/categorization details. Other Onboarding features will not be available until data is aggregated successfully. Application being onboarded is WorkDay

Non Employee Repository

☒ Yes
☐ No

Non Employee Authoritative Application
